

how to play *Yahtzee*

Obtain the highest score from throwing all 5 dice. The game consists of 13 rounds. You must score once in each category on the score sheet. The score is determined by a different rule for each category. The game ends once all 13 categories have been scored.

To start, player 1 rolls all 5 dice. After rolling, player 1 can either score their current roll, or re-roll any or all dice. They may only roll the dice a total of 3 times. After rolling 3 times they must choose a category to score. They may score the dice at any point in the round, i.e., it doesn't have to be after the 3rd roll.
